CATALOGUE.

N.B. The Numbers 1 to 24 represent the 24 Linnean Classes (see Column 1st), whereas those indicating the Linnean Orders (2nd Column) and the Natural Orders (3rd Column) are arbitrary; their signification is given above (see Page 3rd). Example, *Campanula*, 5, 25, 78, belongs to the 5th Linnean Class, *Pentandria*, the flower having 5 Stamens; to the Linnean Order *Monogynia*, from its having 1 Style (Pistillum); and to the Natural Order *Campanulaceæ*, plants with Bell-shaped Flowers. See page 7.

MISCELLANEOUS FLOWER SEEDS.

The following Plants, with few exceptions, have no popular name; thus *Ageratum mexicanum* is rendered Mexican Ageratum, &c.—In giving orders it is sufficient to mention the numbers and date of this Catalogue, 1849. N.B. The numbers are changed every year.

*Best for Autumn Sowing.

** *The Wrinkled Marrows*, No. III., form a distinct class, and can be highly recommended. Carter's Victoria Marrow is warranted the largest and finest-flavoured of all the white Peas. Waite's King of the Marrows is an extraordinary large new green variety of first-rate quality. * Fairbeard's Champion of England, see 1, though very early, belongs also to this class. † Best for the latest crop.
